## **Nursing Survey on Patient Handling Tasks**

What are the most physically demanding duties you perform when working with residents? For each of the following, mark the answer that best describes how much effort is required. For any task that you do not perform, mark the box, "Do not do this task."

	this task	heavy	heavy	Very heavy
Transferring residents from toilet to chair or chair to toilet				
Transferring residents from chair to bed or bed to chair				
Transferring residents from bathtub to chair or chair to bathtub				
Transferring residents in and out of shower				
Transferring residents from chair to chair (for example, transfer between shower chairs, wheelchairs, and chairlifts)				
Weighing residents				
Lifting or sliding residents into bed				
Turning residents in bed				
Repositioning residents in chair				
Making bed with resident in it				
Undressing resident				
Tying supports				
Feeding bed-ridden resident				
Making bed when resident is not in it				
If you perform other physically stressful tasks that are not listed, please list them below and check the box that best describes the level of difficulty
